Base Logistics takes delivery of New State of the Art Mobile  
Command Center

Base Logistics recently took delivery of its new 48 foot state of the art command center. This unit with three slide outs is loaded with the latest in technology and is equipped and ready for the 2011 hurricane season. The unit comfortably seats ten people while providing 4 Dell equipped work stations and 4 additional stations with data and phone ports. Satellite internet service (1024kbps base bandwidth may be boosted to 2056 kbps), satellite TV with two 42 inch televisions as well as fax through tellular. Voice communication is accomplished with 8 tellular phone lines matched with a Cisco IP phone system augmented by 2 satellite handheld units as well as voice over IP technology for tellular back up. A 6 seat conference table, restroom, built in coffee maker and microwave make the unit completely self-contained as power is provided via a 12kw generator.
